Subject: Call For Nominations: Editor-in-Chief
To: <haixun.wang@instacart.com>

Dear Sir,
Hope you are doing well as per your mail received on 3rd October 2023.
I attached my CV for self Nomination in TKDD.

As per my vision for the future development of TKDD:
My vision for TKDD's evolution revolves around fostering innovation, inclusivity, and impact.

Firstly, innovation is at the core of TKDD's growth. I envision TKDD as a platform that not only showcases state-of-the-art research but also encourages the exploration of emerging paradigms in knowledge discovery and data mining. This involves actively soliciting groundbreaking research that pushes the boundaries of traditional methodologies, incorporating interdisciplinary approaches, and embracing emerging technologies to address new challenges in the field.

Secondly, inclusivity is crucial for the continued advancement of TKDD. I aim to create an environment where diverse voices and perspectives thrive. This involves actively seeking contributions from researchers worldwide, irrespective of their backgrounds or affiliations, and ensuring that TKDD reflects a wide spectrum of ideas, methodologies, and applications. By fostering inclusivity, TKDD can become a hub for a global community of researchers, fostering collaboration and knowledge exchange.

Lastly, impact is a key measure of success. I envision TKDD as a catalyst for driving real-world impact through research. This involves emphasizing the importance of translating theoretical advancements into practical solutions that address societal challenges. Encouraging research that has tangible applications across various domains, from healthcare to finance to environmental sciences, will amplify the relevance and significance of TKDD's contributions.

In summary, my vision for the future development of Transactions on Knowledge Discovery and Data centers around fostering innovation, inclusivity, and impact. By championing groundbreaking research, embracing diversity, and emphasizing real-world applications, TKDD can continue to be a leading publication driving the advancement of knowledge discovery and data mining, making a meaningful impact on both academia and society.

 Thankyou for the nomination.

With Regards
Dr. Karuna Nidhi Pandagre
Associate Professor(MCA)
Bansal Institute of Science and Technology, Bhopal
